

# **JOGMEC's latest activities and organizational change for accelerating Carbon Capture and Storage deployment**

**Sakura Nishioka, Ph.D.**  
**Hydrogen and CCS Project Department**

**Japan Organization for Metals and Energy Security**

**Presentation at Japan CCS Forum 2022**  
**December 1, 2022**

# 1. About us – New task under amended law (November 2022 )

- Japan Oil, Gas and Metals National Corporation (JOGMEC)
  - **J**apan **O**rganization For **M**etals and **E**nergy **S**ecurity (JOGMEC)
- Aim to secure the stable supply of energy and natural resources for Japan and to realize carbon neutrality through CCS, supply of low/zero carbon fuels including hydrogen, ammonia, geothermal energy and wind power.

## 2. CCS activities -1

### R&D

- Site screening and site selection
- Site characterization
- Evaluation of well integrity
- Modelling and simulation
- Monitoring and model calibration
- DDR membrane
- JAPAN-GTL...and more.

### Business environment analysis

- Analyze and share the trend and updated information on following topics with stakeholders; CCS related policies, each country/region's licensing, certification and incentive scheme, carbon market, climate policies...and more.

### Publication of guidelines

- Recommended guideline for the implementation of Carbon dioxide Capture and Storage projects Ver.1 (JOGMEC CCS guideline)
- Recommended guideline for calculating GHG emission from LNG/Hydrogen/Ammonia production facilities Ver.1 (JOGMEC GHG/CI guideline)

*\*Updated version is expected to be published next spring !*

### International cooperation

- Accelerating global collaboration including following parties; Saudi Aramco, Pertamina, Government of Alberta (Canada), Government of Victoria (Australia), Asia CCUS network, Global CCS Institute, CCS+ Initiative...and more.

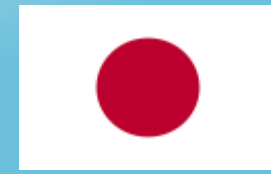

### 3. CCS activities -2

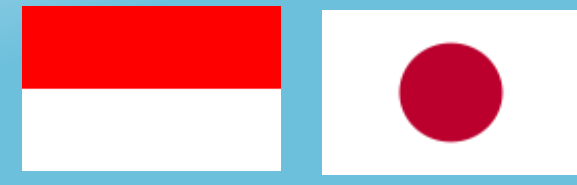

Exploring Commercial Potential of Clean Ammonia Production Business

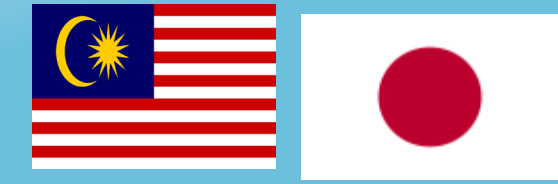

CO<sub>2</sub>-EOR/CCUS Pilot Test in Agano City, Niigata Prefecture

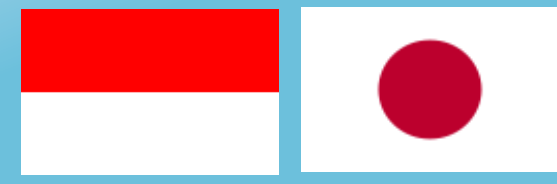

Joint Study of CO<sub>2</sub>-EOR/CCUS in the matured reservoir

Joint Study on the Development of CCS at High CO<sub>2</sub> Gas Fields

CCS Joint Study for Clean Fuel Ammonia Production

Feasibility on Establishing a Clean Fuel Ammonia Supply Chain From Australia to Japan

Feasibility on CCS for Creation of a Supply Chain of Low Carbon Ammonia

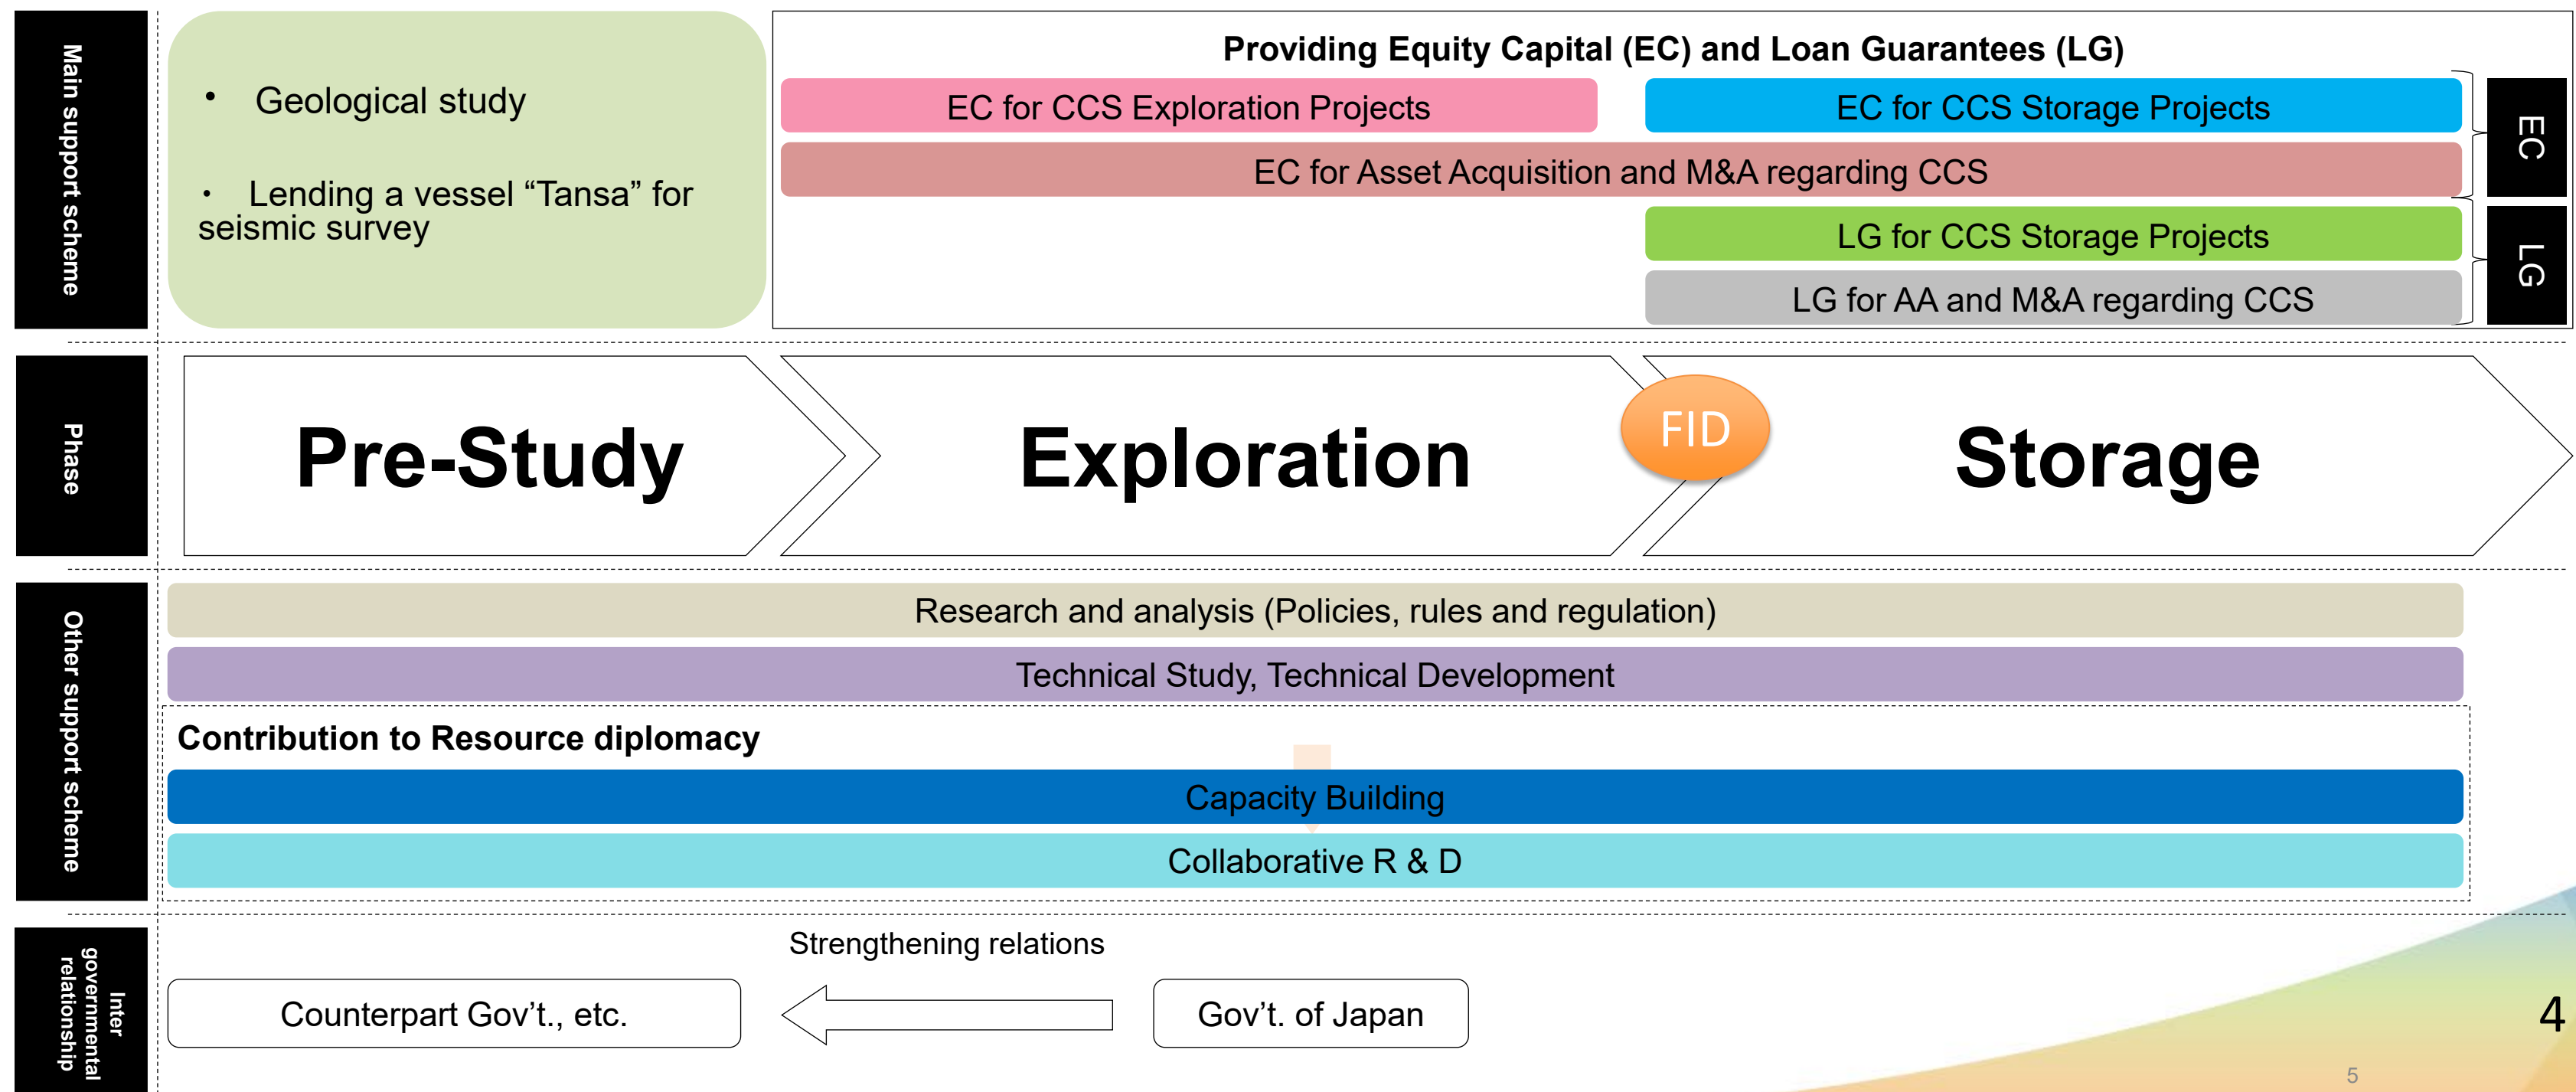

CarbonNet (Development of a CO<sub>2</sub> Specification for a CCS Hub Network)

# 4. New support scheme for CCS - Overview

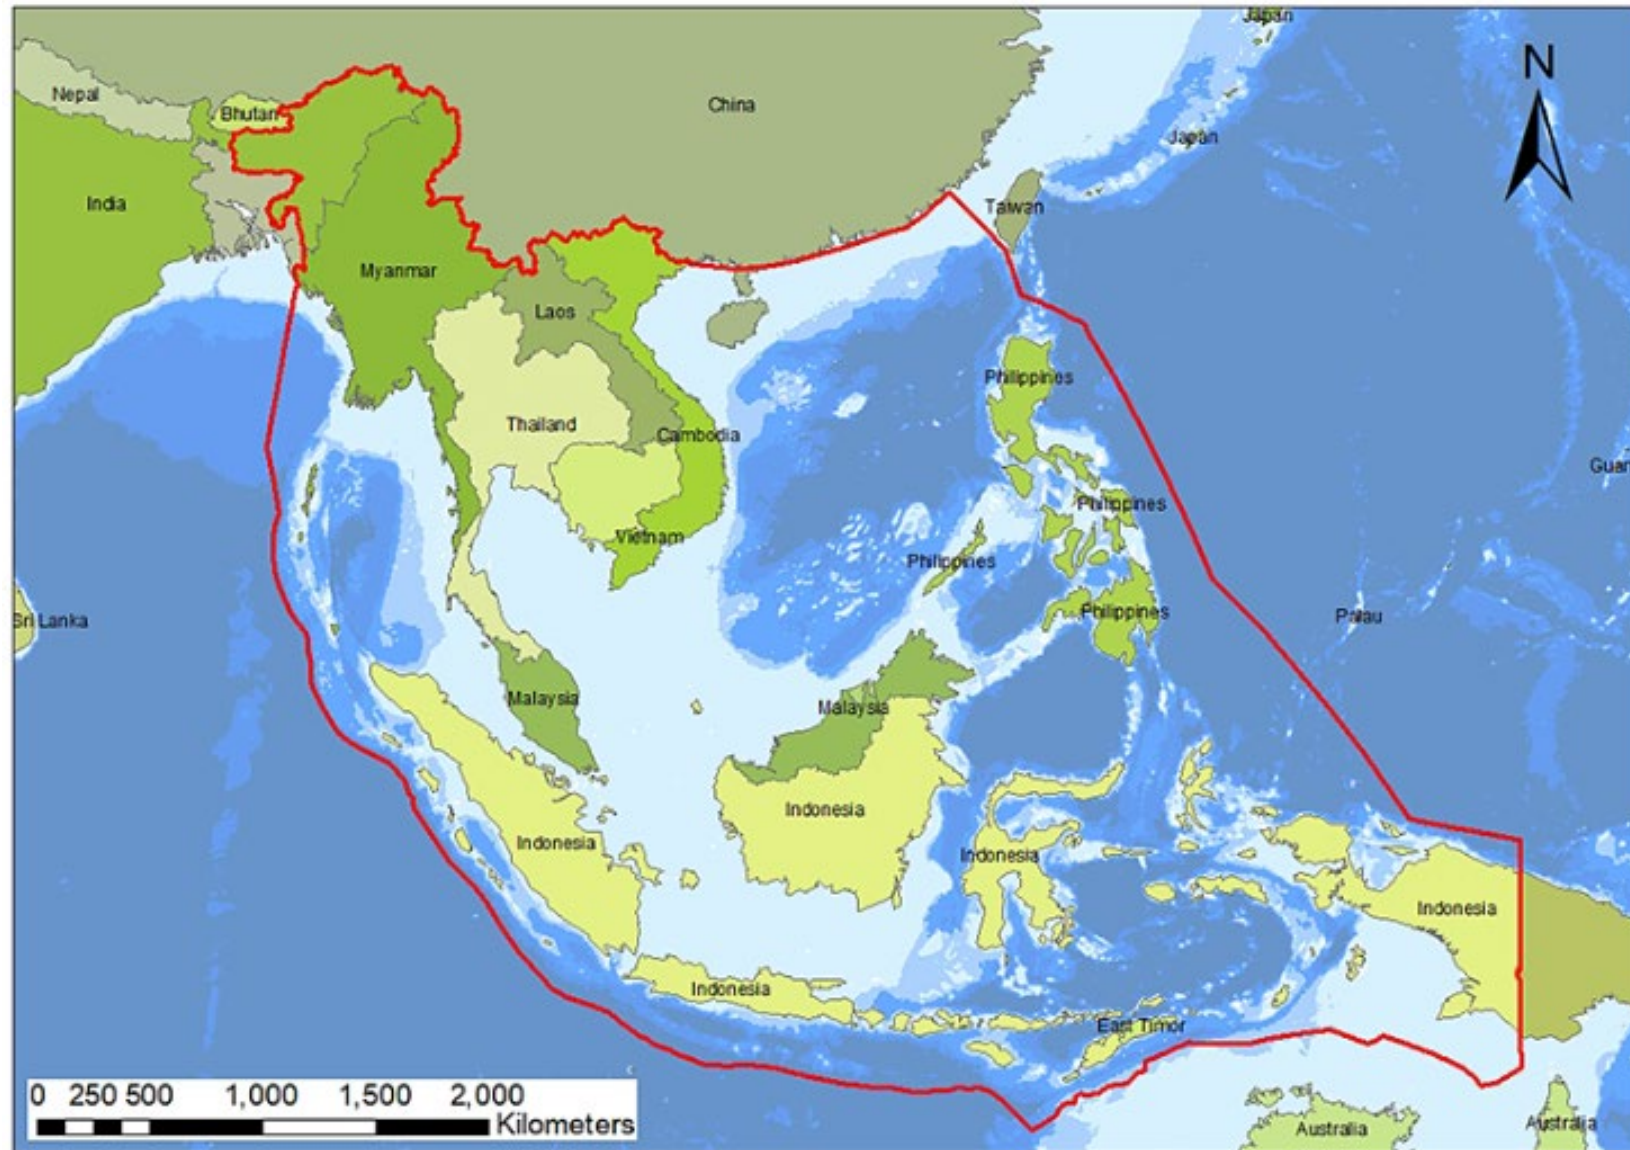

- JOGMEC promotes and supports CCS projects conducted in overseas and the coastal waters of Japan which involves Japanese companies' participation.
- Pre-Study phase - JOGMEC conducts and support geological survey in order to secure suitable areas for CO2 geological storage .
- Exploration and Storage phase- JOGMEC provides Equity Capital and Loan Guarantees.

## 5. New support scheme for CCS – Pre-study phase

- JOGMEC conducts exploration for candidate storage sites (domestic and overseas).
- ◆ JOGMEC conducts screening study for CCS-suitable sites. The outcome results will be shared with private companies.
- ◆ JOGMEC-owned 3D survey vessel “Tansa” will be utilized for governmental and Japanese companies’ survey projects.

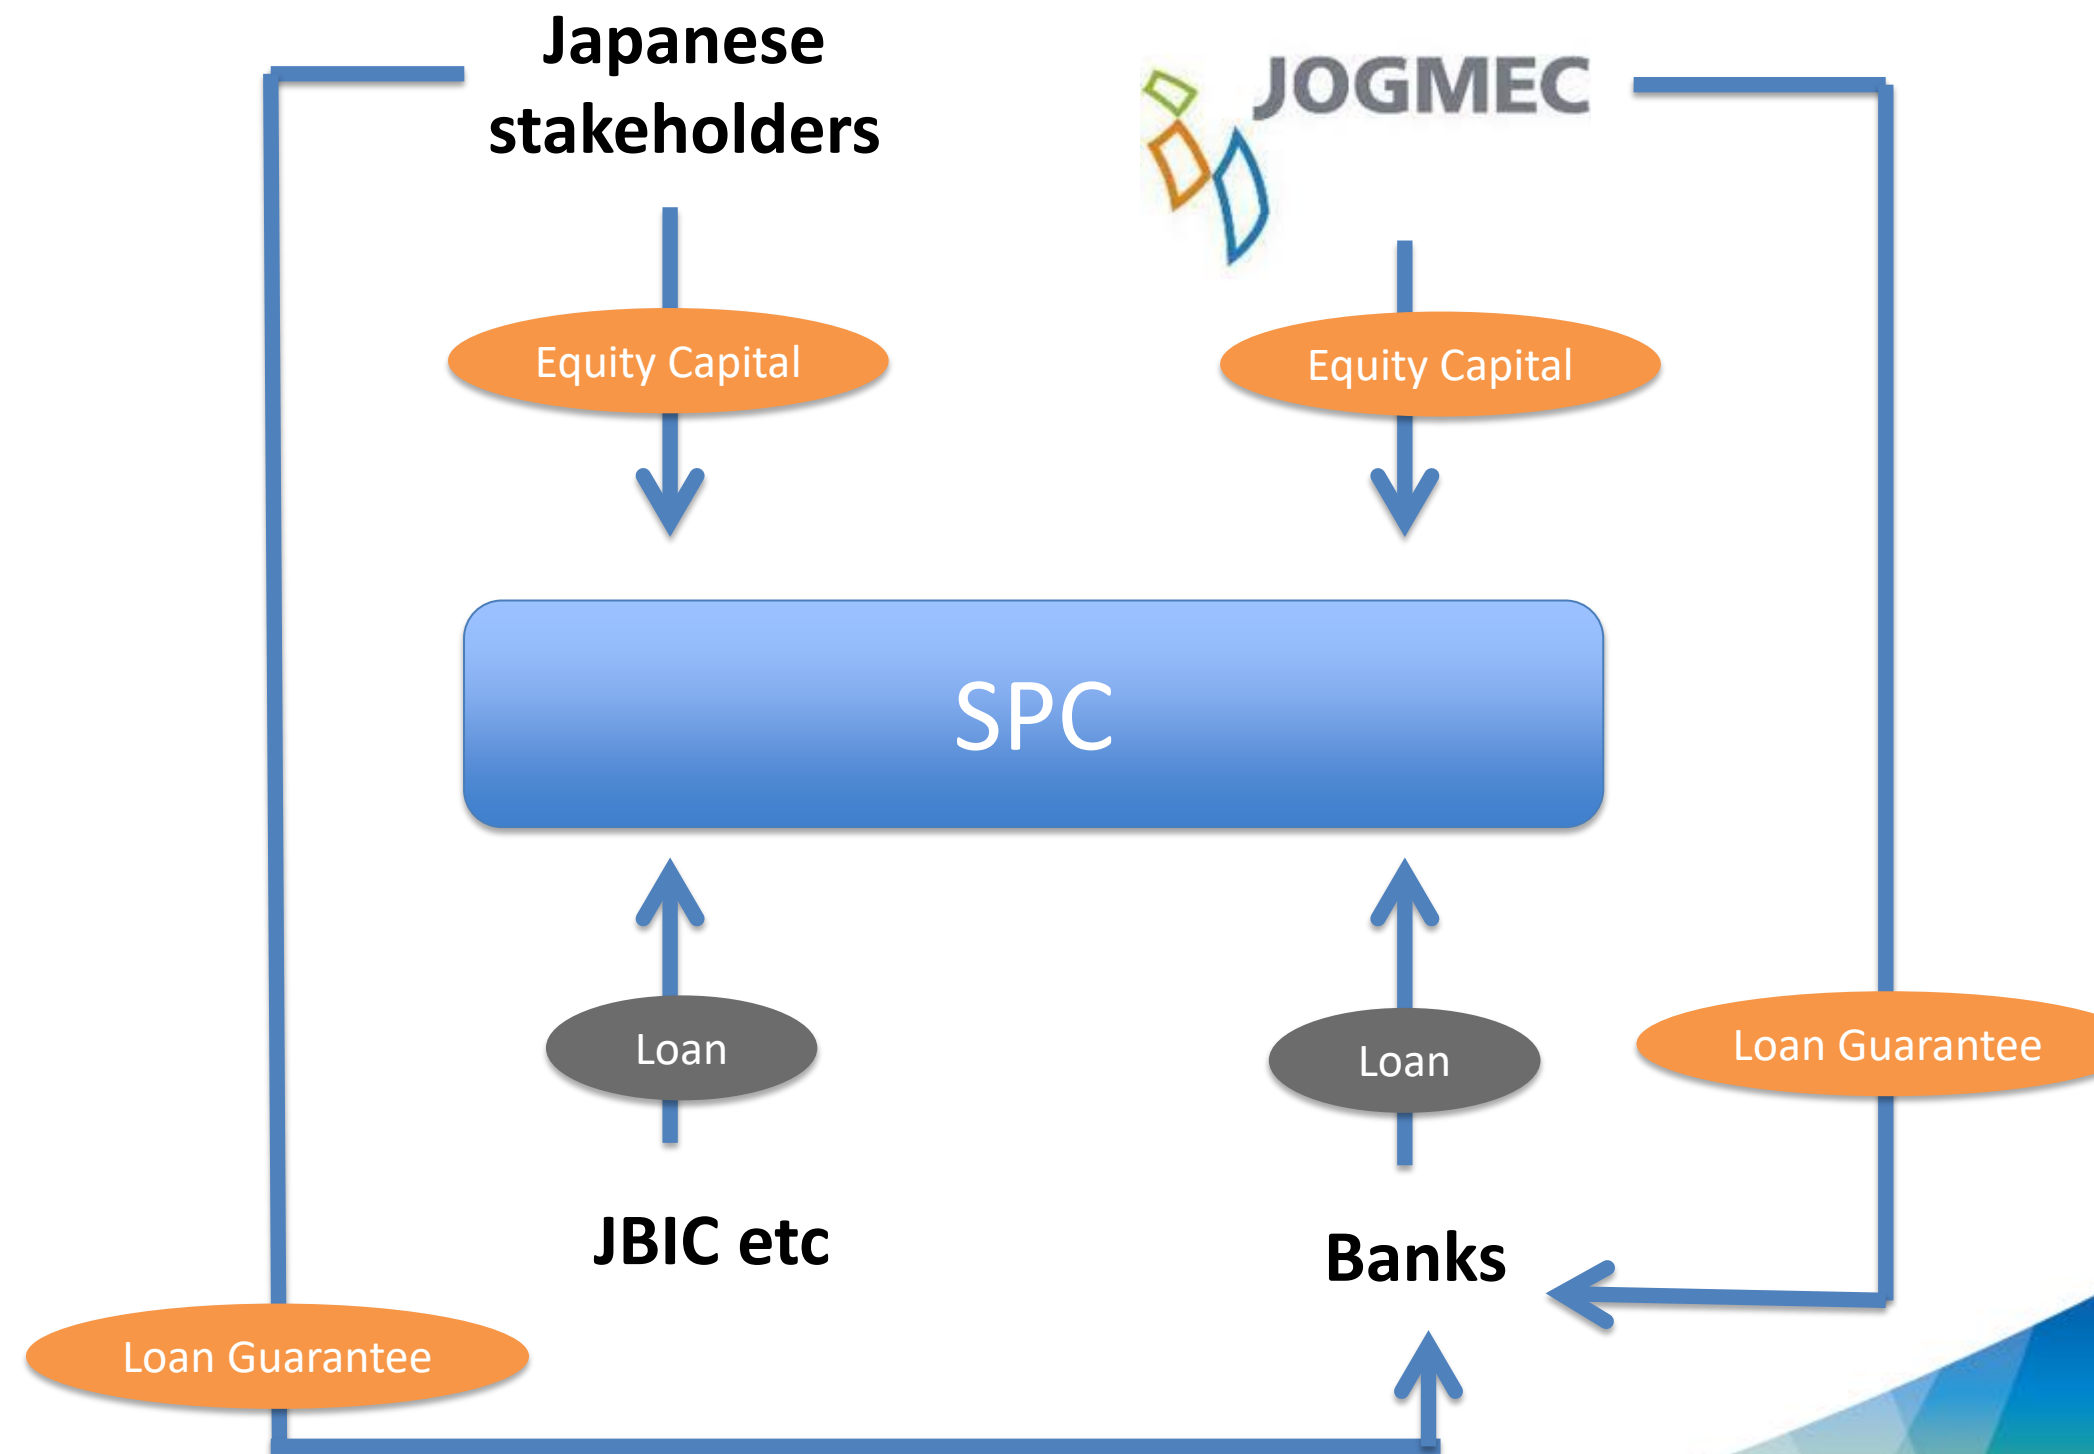

## 6. New support scheme for CCS – Exploration and Storage phase

- JOGMEC provide equity capital (EC) and loan guarantee (LG) for exploration and storage phase.
- Proposed project must contribute to stable supply of energy to Japan.
- **Estimated scale of JOGMEC support**  
Feasibility Studies -Approx. 100 million yen  
PreFEED-  
Approx. Several hundreds of millions of yen  
FEED- Approx. Several billions of yen  
Technological development-  
Approx. Tens to hundreds of millions of yen
- **Implementation structure**  
JOGMEC and the project proponent.  
Outcomes will belong to JOGMEC or both parties.

- Example of scheme
